

EXPANSIA Chooses Kline & Company for Long-Haul DCAA Compliance & Accounting Success

Delivering Innovative and Rapid Technology Deployment

In order for the United States to maintain its technological advantage in today's ever-changing IT environment, in service to the warfighter, *deploying technology faster* is a must. In today's fast-paced market, many other organizations sacrifice quality service, customer satisfaction, and product innovation for the bottom line. EXPANSIA Group LLC discards this notion and rises to deliver excellence in all that the company pursues.

Services Snapshot

Real Solutions to Real Problems

With a mission to help customers deploy technology faster, EXPANSIA is a recognized leader in business strategy design, development and execution, and technology integration for our nation's defense organizations.

- Program & Technology Strategies
- Additive Manufacturing
- IT & Cloud Solutions
- Lean, Agile & Dev Ops
- Talent Acquisition & Recruiting

EXPANSIA helps its clients to deploy technology and innovation faster, and is committed to building long-term relationships with its clients and partners by focusing not only on excellent results but also on the methods and communication tools we use to achieve them. This approach is reinforced through EXPANSIA's P.A.C.T. that they make to all clients, to its company, and those who secure our nation:

- **Passion** for successfully delivering transformative results
- **Accountability** to our customers and to each other
- **Courage** to decide and act
- **Transparency** with integrity in every action

EXPANSIA partners with government agencies and commercial entities to transform, scale, and implement needed frameworks, strategies, and innovations that enhance and secure technology.

EXPANSIA is proud to count the United States Air Force and the United States Space Force among its many DoD clients, designing and deploying

innovative rapid delivery solutions to support development operations. The company also supports several DoD partners with rapid technology deployment solutions. Learn more about the EXPANSIA story by visiting the company site at www.expansiagroup.com

Kline & Company is Keeping EXPANSIA “In The Game” of DCAA Accounting

EXPANSIA Group is a growth-oriented, innovative business that is responsive to client demands, both public and private. The firm’s agility must keep pace with the client-side demand for smart, fast, and innovative solutions. Agile deployment is the company’s hallmark and knowing their accounting system is in place allows the company to focus on core competencies.

From the beginning, Kline & Company has taken a leadership role in preparing EXPANSIA to meet the DCAA Compliance requirements the company faces as a federal contractor. The accounting staff has guided EXPANSIA with expert advice in government accounting, including:

- Setting up an adequate accounting system, as defined by the DCAA
- Preparing tax filings and providing corporate tax advice
- Providing bookkeeping support as required
- Preparing ICE Submissions to the DCAA
- Serving as a support resource for our Unanet Accounting System to ensure accounting system performance

As EXPANSIA grows into new business areas, the services portfolio of Kline & Company will continue to play a key role in the success of new enterprises.

Rapid strategic problem solving and creating technical advantage are, in large part, what drives EXPANSIA to meet the challenges of its clients worldwide. From best practices and innovation in software development and cybersecurity, to additive manufacturing for faster, agile solutions, to playing an important role in supporting such clients as the United States Air Force (USAF), the company offers a broad range of services to support America’s defense readiness.

Whether on the battlefield or in the boardroom, EXPANSIA delivers true advantage. The company also supports the private sector to help rapidly adapt to changes in the marketplace, and to transform a business’s ability to outpace the competition.

“Among the things I like best about working with Kline & Company are the team-oriented approach to the support they provide for us, and the fact that the people at Kline, whom we view as members of our own team, are highly accessible. As the CFO for EXPANSIA, I greatly appreciate that they go far beyond the accounting transactions in their support of our business. The Kline leadership team takes a long-haul view on our relationship, and we share a similar growth mindset, which we also appreciate. We are in good hands when it comes to federal contracts accounting and fulfilling our DCAA Compliance requirements. We feel cared for, and that’s very important to us.”

- Richard J. Nelson, PhD , Chief Financial Officer

About Kline and Company CPA, PC

Federal government contractor accounting is our primary area of specialization. If you are a DoD contractor or do business with the US government, you can tap the expertise of our seasoned team of DCAA consultants, which includes former DCAA auditors. You will find that our real-world experience is invaluable in helping you meet the complex requirements of the Federal Acquisition Regulation or representing you for a DCAA audit.

Our mission is to help you achieve yours! Visit www.klineco.com for more information.
